

Name: Nguyen Dang Tinh

Water Resources University

Hochiminh city, Vietnam

research interest

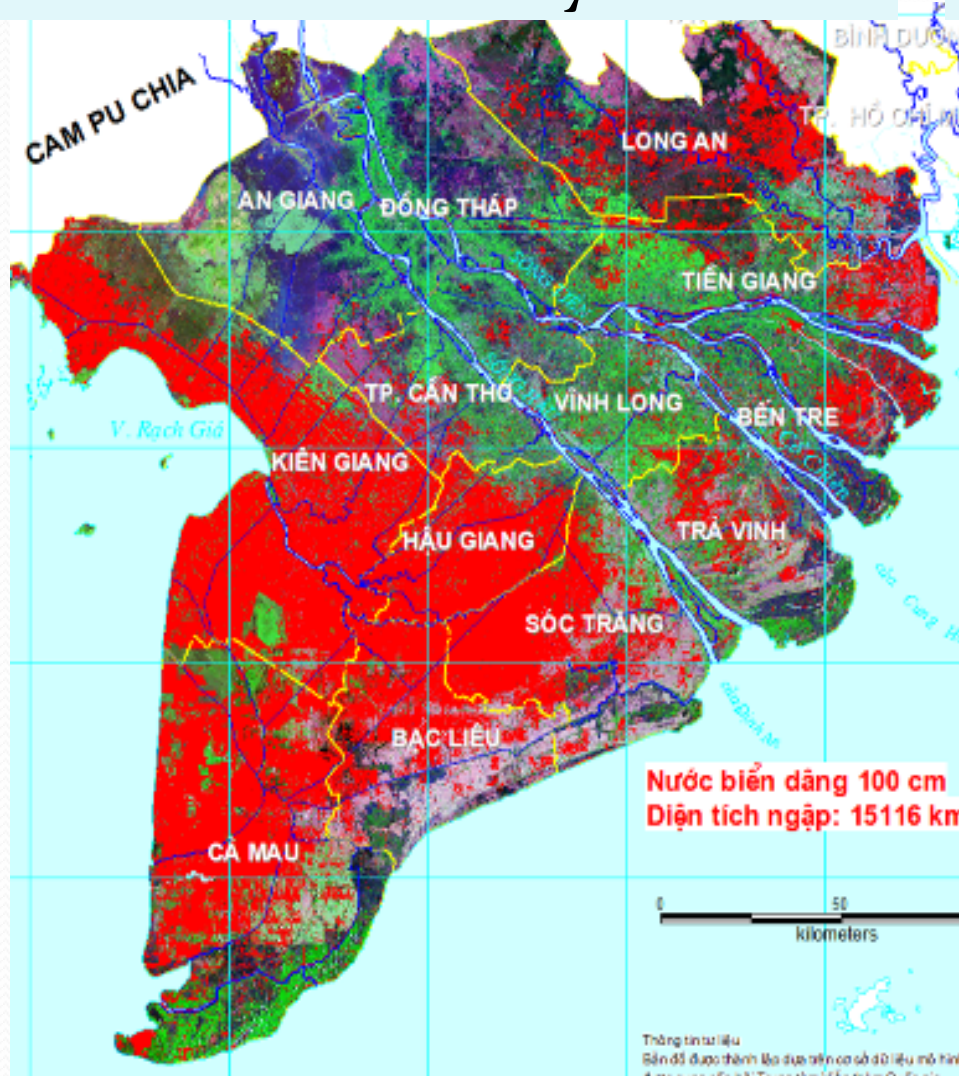

Mekong Delta in Vietnam!

1. What have happened to?
2. How would it be in 30,50 years?

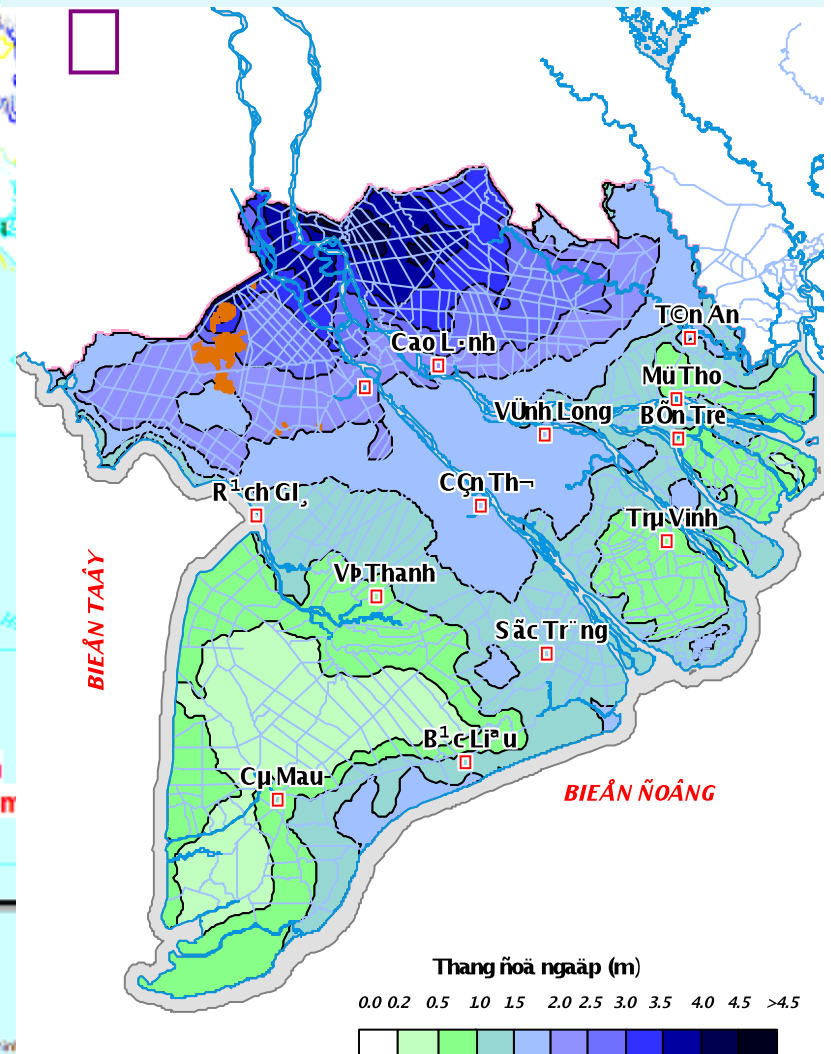

1. Impacts from Sea
2. Upstream Impacts

Impacts From Sea – Sea Level Rise

Inundation in dry season

Flooded in flood season

Upstream Impacts

1. Upstream Hydropower dams
2. Changes in Flow Regime
3. Increase in Water Demand
4. Deforestation

Mainstream dams on the Mekong

Future work!

1. Trans-boundary management issues
2. Integrated water management of the basin
3. Must be regional and spatial planning with long vision and joining of all sectors
4. Transfer of Technologies, joining research projects
5. Capacity building
